Rithvik Santosh Shetty

+91 98338 75297 | rithvikshetty2004@gmail.com | LinkedIn | GitHub | Portfolio | Thane, Maharashtra

Summary

Fullstack developer and AI/ML engineering graduate (2026) with hands-on experience building and shipping production React and Next.js applications, including trct.in (6,000+ users) and interviewdump.dev. Published developer tooling (DevTune) with 500+ installs. Seeking an entry-level frontend developer role in a product team.

Education

SIES Graduate School of Technology Nov 2022 – Jan 2026
BE in Artificial Intelligence and Machine Learning *Navi Mumbai, India*
- Relevant Coursework: Web Technologies, Data Structures & Algorithms, Computer Vision, NLP, Deep Learning

Experience

Freelance Frontend Developer Mar 2024 – Present
TRCT — The Run Club Thane *Remote*
- Built a responsive, mobile-first UI with Tailwind CSS and Shadcn UI; developed reusable React components (cards, gallery, forms, modals) used across 8+ pages; verified cross-browser compatibility across Chrome, Edge, Firefox, and Safari.
- Migrated to Next.js 15 App Router with SSR/SSG for optimised page loads; integrated Razorpay payment gateway with multi-step checkout UI, order confirmation, and error handling flows; added Framer Motion scroll animations throughout.
- Optimised web performance to achieve a 100 Lighthouse score, contributing to a 20% increase in user engagement across 5,000+ monthly visits.

Python Developer Intern Jan 2025 – Apr 2025
Ion Chemicals *Navi Mumbai, India*
- Engineered a computer vision anomaly detection pipeline using OpenCV and Python, reducing manual inspection time by 40% through automated defect identification in industrial pipelines.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python
Frameworks: React, Next.js 15 (App Router, SSR, SSG, ISR), React Native, Expo Router
Developer Tools: Git, GitHub, Version Control, Vercel, Figma, UI-UX, Adobe Illustrator, Linux
Libraries: React Hooks, Component-Based Architecture, Reusable Components, Context API, Tailwind CSS, Framer Motion, Shadcn UI, Responsive Web Design, CSS Animations, Cross-Browser Compatibility, Core Web Vitals, Web Performance Optimisation, Lighthouse, Node.js, FastAPI, REST APIs, NextAuth, JWT, OAuth2, PostgreSQL, MongoDB, MySQL, Supabase, Razorpay, Stripe, Spotify Web API, Twilio, WhatsApp API, OpenCV, PyTorch

Projects

AnyFormat | *Next.js, TypeScript, Tailwind CSS, Supabase, Upstash Redis, Razorpay, Cloudflare Turnstile* | anyformat.rithvikshetty.in2026
- Implemented Upstash Redis for caching and API rate limiting, and Cloudflare Turnstile for bot protection on public-facing endpoints; connected Supabase for data persistence across the file conversion and URL shortening services.

InterviewDump | *Next.js 14, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Vercel* | interviewdump.dev 2026
- Implemented Google OAuth via Supabase Auth with `@supabase/ssr` for server-side session handling; user progress persisted in PostgreSQL while question content is served as static JSON at build time — zero backend cost at scale.
- Achieved Lighthouse SEO score of 100 on desktop through Next.js metadata API, Open Graph tags, robots.txt configuration, and sitemap generation.

DevTune | *TypeScript, Node.js, VS Code Extension API, Spotify Web API, OAuth2* | github.com/rithvikshettyy/DevTuneMar 2026
- Built a VS Code extension for Spotify integration using TypeScript and OAuth2 PKCE, enabling developers to manage playback state directly within the IDE to minimise context switching.

XComment | *Playwright, Google Gemini API, TypeScript, Node.js* 2026
- Built a Playwright and Gemini-powered automation tool that targets viral posts on X (Twitter) Explore and creator-inspiration feeds, generating contextually natural, organic reply comments via Gemini's generative API.
- Implemented stealth browser automation with human-like timing and randomisation to avoid detection; integrated Gemini prompt engineering for tone-matched, high-engagement comment generation.

Sereno | *Next.js, TypeScript, Twilio, WhatsApp API, PostgreSQL, QR Automation* 2026
- Built real-time citizen feedback infrastructure for government offices using WhatsApp-based state-machine bots that guide users through structured feedback flows triggered via automated QR code nodes.
- Designed the bot state machine to handle multi-step conversations, persistent session tracking in PostgreSQL, and automated QR generation for physical deployment across office touchpoints.

SeaGuard | *React Native, Expo Router, FastAPI, Twilio, Figma* | github.com/rithvikshettyy/SeaGuard Sep 2025

- Developed a cross-platform React Native safety app for maritime use, integrating real-time GPS boundary monitoring and automated Twilio SMS emergency alerts for rapid incident response.
- Won HackCelestial 2.0 Most Product Readiness Award (200+ teams, team of 6); presented live demo before ISRO leadership.

AutoPharmaX | *Python, PyTorch, FastAPI, scikit-learn, XGBoost, Streamlit, Agentic AI* | github.com/rithvikshettyy/autopharmaxJul 20
- Built an AI-driven platform that analyses global drug efficacy data and clinical insights to optimise treatment outcomes; features agentic AI tooling for researchers to query and synthesise trial data autonomously.
- Developed a doctor-style chatbot providing patients with personalised, data-backed guidance using retrieval-augmented generation over clinical datasets. Co-authored IEEE conference paper. Team of 4.

Certifications & Awards

HackCelestial 2.0 – Most Product Readiness Award: Pillai College of Engineering (2025), 200+ competing teams
Introduction to Machine Learning on AWS: AWS & Coursera (2025)
Data Analytics Job Simulation: Deloitte (Forage, 2025)
Introduction to Model Context Protocol: Anthropic (2025)
